Settings file locations

Depending on your platform, the user settings file is located here:

- **Windows** `%APPDATA%\Code\User\settings.json`
- **macOS** `$HOME/Library/Application\ Support/Code/User/settings.json`
- **Linux** `$HOME/.config/Code/User/settings.json`

Reset all settings

While you can reset settings individually via the Settings editor **Reset Setting** command, you can reset all changed settings by opening `settings.json` and deleting the entries between the braces `{}` . Be careful since there will be no way to recover your previous setting values.
